

## Pharmaceutical & contract manufacturing

### Mentor supports FDA-regulated industries

BY AUGUSTO DURAND

With its highly trained staff of engineering and technical professionals, Mentor Technical Group Corp. provides effective support and solutions to Food and Drug Administration (FDA)-regulated industries in Puerto Rico. "We deliver solutions with a flexible and cost-effective approach to meet our customer's specific needs," said Iván Feliciano, validation team leader at Mentor Technical Group.

"Our objective is to deliver reliable and expertly tailored solutions," said Feliciano. Mentor offers services that start with consulting all the way to introducing its facilitators into a customer's staff. "We develop customized frameworks to help our customers unlock the hidden values in their plants, facilities, equipment and people with an optimal integration of resources, regulations and technology," commented the validation specialist.

*Iván Feliciano, validation team leader at Mentor Technical Group offers its customers an optimal integration of resources, regulations and technology.*

Mentor's team of 180 professionals provides its customers complementary and overlapping skills in all aspects related to manufacturing, packaging, technology, GMP compliance, validation, engineering and systems management. Mentor is unique in its ability to perform multiple tasks while functioning as a successful team.

Servicing the pharmaceutical, biotechnology, medical device, power plants, process & waste, water plants, food & beverage, hospitality and government sectors, Mentor always delivers on its commitments, he said. "Our enthusiastic and highly skilled technical workforce consistently meets or exceeds our customers' expectations," said Feliciano. "We combine performance with integrity in our maximum utilization of available resources."

With skill and experience in providing guidance toward regulatory compliance and validation, Mentor's specialists provide a knowledge base that allows customers to remain focused on their primary business goals and objectives without unnecessarily tasking their key personnel with a compliance and validation overload.

Mentor offers sustainable solutions to utilities, manufacturing, packaging and computer system validation needs, supporting projects ranging from strategic consulting to the execution of

large-scale compliance programs.

"Our experience in new facility construction allows us to coordinate validation activities con-

currently with facility construction projects during commissioning or start-up," Feliciano said. "This ensures our customers a flawless installation." ■
